

Hotelogix – Brief Overview

Hotelogix is a web based Property Management System that supports multi-currency, multi-property, and is fully integrated with powerful features that are amazingly simple to use.

There is a long & worthy list of features that will definitely impress you.

Broadly -

- Hotelogix is designed to seamlessly integrate Reservations, Frontdesk, Housekeeping, Spa, POS's, and even your website, your Marketing Offices (multi-location) & the Travel Agents you work with, on a unified platform.
- You can create unlimited number of integrated Point's of Sales (touch-screen ready POS) for your property on Hotelogix.
- The web reservation engine will let you book your hotels directly from your website and give immediate confirmations and latest up-to-date inventory.
- Hotelogix supports multi-currency, multi-property and soon multiple languages.
- You would be able to manage rooms on all major distribution channels and room inventories on the GDS & IDS directly through the upcoming versions of Hotelogix Admin Console.

Working with Hotelogix requires just a basic internet connection. There is no limit on the number of terminals or users you may wish to have.

You get this system

- With nothing to buy upfront
- Requiring nothing to install or maintain
- & with little to learn even for most complex transactions.

Summing up, Hotelogix helps in managing all critical aspects of a Hotel property, and additionally enables marketing & distribution of rooms/accommodation inventory to get better returns – thus directly improving the bottom line - profits.

- Hotelogix will let you streamline your operations and manage your web reservations much more conveniently through its integrated Web Booking Engine (available in trial account). Web bookings allow both Single and Group bookings along with online sales of your add-on services and enables instant confirmations with Credit card Guarantees and/or Deposits online.
- Hotelogix further lets you conduct Travel Agent and Corporate Reservations on Negotiated Contract rates, directly through integrated consoles. The need to maintain separate inventories, or the activities like logging/tracking of fresh bookings, or sending confirmations, charging cancellations/no-shows, managing deposits, will be all but eliminated with complete automation of this process through the system seamlessly.
- The built in POS's (multiple) let you manage your Restaurants, Spa's, Mini bar and more and maintain these Profit/Cost Center at your Hotel Property with amazing simplicity.
